## Bulk water delivery

We operate a fleet of water tankers to deliver non-drinking water to sites across the North West.

Our water can be used for toilet facilities, drains testing, barrier filling, swimming pool filling and many more uses.

We can also include chlorine dioxide tablets with the delivery for a small additional cost, which provide additional purification.

## Water bowser hire

We hire static water bowsers in 1,000L and 2,000L capacities. Our **WRAS-approved** bowsers provide UV protection to reduce the build-up of algae. Our bowsers are also:

- made from a seamless potable-approved polymer material
- designed as a one-piece moulding
- suitable for domestic, agricultural and commercial use
- complete with a lockable lid
- delivered with a ball valve and 15mm Pushfit outlet

## IBC sales

We sell IBCs for a variety of uses. We can also provide adapters to convert the standard 2" outlet into a 1" BSP outlet. Please contact us for the latest prices..

## Why us?

We are a family-run business and over our 30 years in business we have developed a strong reputation for customer satisfaction and top quality service, recently winning North West Family Business of the Year 2023 in our category.

We are a CHAS, ISO 9001 and ISO 14001 certified business, and a proud Real Living Wage employer.

We pride ourselves on our service – this is what sets us apart from our competitors. We will do everything we can to meet the expectations we have of ourselves, and those that you set us. Our aim is to be the best value for money in our industry.

# Frequently asked questions

## How much water can you deliver?

We can deliver up to 9,000L in one visit and up to 30,000L per day.

## Is your water drinking water?

Our water is not suitable for drinking. Whilst it originates from the mains supply and we regularly test our water for legionella, coliform, E.coli and general bacteria to ensure that the water we provide is as clean as can be, the risk of cross-contamination does still exist and so it is not labelled as drinking water and should not be used as such.

## When can you deliver?

We generally aim for a next-day delivery service but can very often accommodate same-day deliveries, too.

## What access do you need to deliver?

We deliver water using 18 tonnes HGVs and will need to be able to park within 30m of the vessel being filled. IBCs and bowzers are delivered using 3.5 tonnes vehicles with tail lifts.

## What size is an IBC?

IBCs are roughly 1 cubic metre and hold around 1,000L of water.

## How big are your water bowzers?

Dimensions	1,000L	2,000L
Height	1060mm	1300mm
Width	1420mm	1956mm
Depth	1100mm	1299mm

## What does WRAS-approved mean?

WRAS is the Water Regulations Advisory Scheme. A product is WRAS-approved if it complies with the high standards set out by the regulations of the scheme.

## Can your water bowzers be towed?

Our water bowzers are static and are not towable.

Challenger Site Services (NW) Limited is a company registered in England & Wales. Registered Number 15033595.
